UNION GOSPEL MISSION'S CLOTHING DONATION BIN PROGRAM

Providing essential resources to those we serve, with 100% of donations bringing help to those in need.

We give the best clothing freely to the needy, and recycle the surplus clothing to assist in many other vital programs. Each host location, depending on its traffic density and square footage, is able to support one or multiple **TOSS BOX** bins. Our bins are well-maintained and serviced frequently. Donors can conveniently deposit clothing, and we are responsible for the logistics and services required for the collection program.

Union Gospel Mission began in 1933 in downtown Winnipeg to meet the physical and spiritual needs of the area residents. The ministry has continuously expanded to meet the challenges of addictions, homelessness, unemployment and low income. Today, we administer an adult education program, live-in addiction programs for men and women, various children's programs, and food and clothing distribution. In addition, we serve over 100,000 meals annually, and offer prayer, hope and love to those facing the challenges of life in Winnipeg.

Union Gospel Mission is dedicated to providing clothing and household linens without cost to the members of Winnipeg's population who do not enjoy the abundant level of resources available to many of us. With the placement of bins throughout our city, we are able to acquire the materials needed to meet this need. It is our goal to identify convenient locations for these bins. We are seeking to place more bins in retail locations, church lots and other appropriate sites.

Toss Box Hosts - Recycling bins have become commonplace in our communities. Clothing recycling bins are placed at shopping malls, apartment buildings, churches and other locations. You have spent considerable time and money on landscaping and architectural design and therefore we strive to keep **TOSS BOX** clothing bin sites in perfect order. Hosting our **TOSS BOX** clothing collection bins is a simple way for you to help the poor while contributing to environmental waste reduction. This also enables our community to recycle where they live and live where they recycle.
